November 2019

Upcoming Events

**Webinar - Behavioral Health Integration:
Tele-Psychiatry: McPAP Model and
Implementation**
November 12th, 12-1pm PST

Tele-psychiatry is an effective, yet under-utilized strategy for integrating behavioral health into primary care. In this webinar, Medical Director Dr. Barry Sarvet of the Massachusetts Child Psychiatry Access Program ([McPAP](#)) will share the design and results of its successful model, and California organizations implementing the McPAP model will discuss their lessons learned for implementing the model. The Massachusetts Child Psychiatry Access Program (McPAP) is a system of regional children's behavioral health consultation teams designed to help primary care providers and their practices to promote and manage the behavioral health of their pediatric patients as a fundamental component of overall health and wellness. McPAP supports the integration of behavioral and physical health.

PTI Final Video

Summary of the incredible day together celebrating transformation!

[Video](#)

This past September, PTI celebrated its Final Convening. The day was spent sharing and reflecting on our achievements and visioning future improvement work. A big mahalo to everyone who attended. A few highlights from the day included:

Elizabeth Mitchell, PBGH CEO, shared, "You are setting the standard for healthcare needs across the county. You are doing things everyone says is impossible and taking away their excuses. You have done the heavy lifting and heroic work transforming practices at the practice level."

Fiona Wilson, PTI Medical Director, also shared "I've watched you all grow professionally and personally and it's been amazing! We grew a network of like-minded thinkers!"

Enjoy this [5 minute video](#) highlighting our time together!

Midwifery Integration Guide & Resources Available

Moms want the option of a midwife for their maternity care team, and PBGH's Transform Maternity Care program has the resources to help practices meet those needs.

- **Midwifery Integration How-to-Guide:** We researched high-functioning collaborative practices and

developed a midwifery integration toolkit to guide health system leaders through the operational, cultural, and financial considerations to adopting a midwifery strategy. This resource is free to download from our website: pbgh.org/midwifery

- **Collaborative Maternity Care Best Practice Presentation:** We developed a grand rounds presentation for clinical leaders and front-line staff regarding the benefits of physiologic birth and physician-midwife collaborative care. Invite us to come speak to your maternity service line; we can help you lay the groundwork to establish a new program or to optimize collaboration within your current physician-midwifery practice.
